INTERNET BOOKING ENGINE

Turning Goals Into Success

WEBPRO Integrated Production & Promotion

Our experience in developing applications for the tourism industry has led us to the conclusion that the market is lacking a tool that would enable small and medium-sized agencies to independently enter the online market. That's why we've created innovative products for the distribution of travel services on the Internet which are able to meet the demands of a dynamic market and adapt to the needs of end users. We will help you increase your impact on the online market with the help of advanced tools for system management, with multilingualism and sophisticated reporting systems and tools for marketing and promotion.

We understand that the Internet provides new opportunities for growth and business advancement, as well as access to new markets. Our goal is to make the services we offer and the products we develop enable our clients to be unique, for their online business to be functionally and technological-ly advanced and their communication with customers built on trust in the quality of their services and products.

Webpro is a dedicated team of designers, programmers and managers, whose main goal is to meet the demands and needs of clients. Through crucial research and analysis, innovative ideas, creative and functional solutions and interactive design, we assist companies to strategically place their online business and achieve measurable results.

WEBPRO FLIGHT IBE 3.0

Would you like to increase your productivity and sales, and be constantly available to your clients? We suggest a unique and efficient solution.

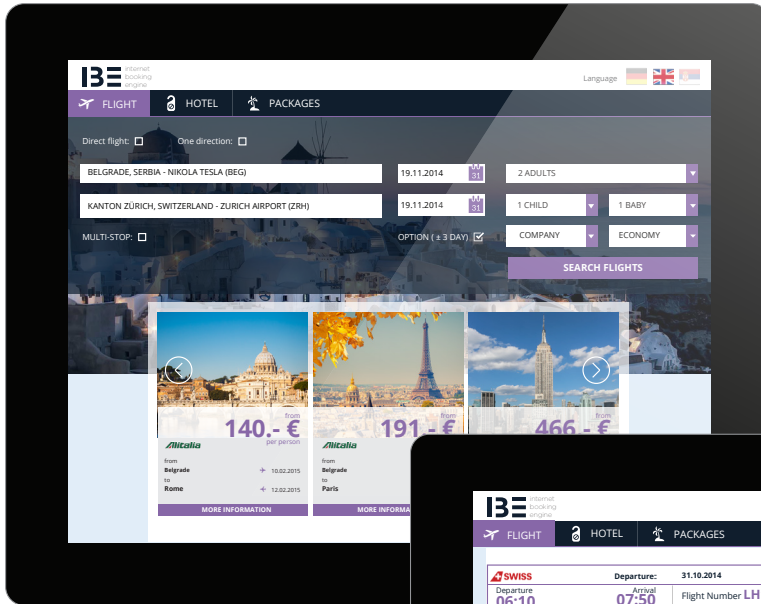

WEBPRO FLIGHT IBE 3.0

Whether you're just entering the online market or you would just like to position yourself better, we have found a way to increase your agency's presence on the Internet and therefore your access to current and potential customers.

Webpro Flight IBE is just one of the tools that enables small and medium-sized agencies to offer their services in the field of air transport to their customers at any time and from any place and thus increase their visibility and significantly increase the number of their clients. Agencies that already have experience with an online booking system have the opportunity to further improve their services and manage their business more efficiently.

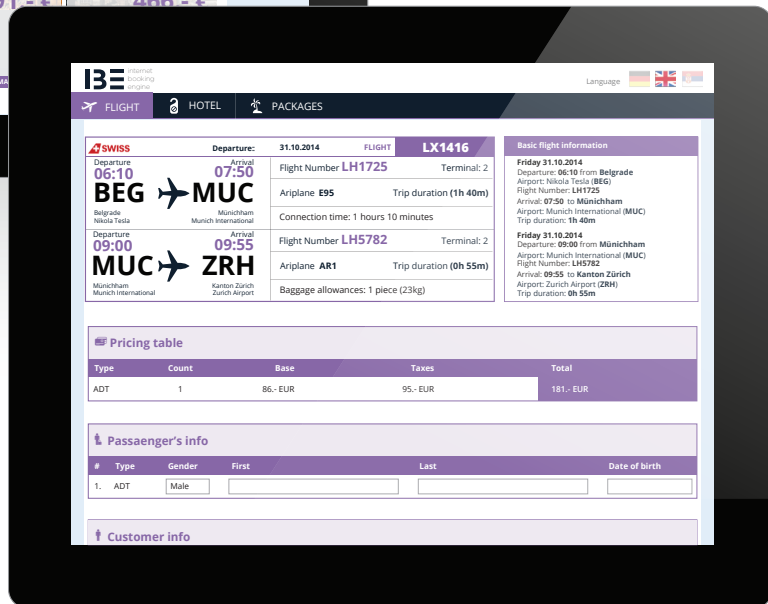

Our aim was to provide agencies with an easier way of managing their online airline ticket store and to provide the website visitors with a unique service.

WHY CHOOSE WEBPRO FLIGHT IBE?

Webpro FLIGHT IBE enables your agency to provide customers with all flights of the largest number of airlines (all IATA tariffs) in one place. In just four simple steps the user makes a reservation for his airline ticket, quickly and easily.

Webpro FLIGHT IBE includes advanced software management tools for booking airline tickets, options for multilingualism and sophisticated reporting systems and tools for marketing and promotions that can help you increase your influence in the online market.

Responsive design that offers the possibility of adapting content to screen size while at the same time maintaining functionality will help your services be available to more customers.

Absolute flexibility of the IBE at the request of the client in each of the four booking steps provides the user with unlimited possibilities. In addition, tools for price control and payment methods are supported as well, so you will never be at a loss.

Webpro FLIGHT IBE is available in three versions:

HOTEL LANDING PAGE WITH OFFERS

WHY LEISURE HOTEL IBE?

With the integration of a clean, simple, comprehensive and accurate IBE, we can help you further improve the functionality and performance of your website, while at the same time help you improve your brand identity.

Leisure HOTEL IBE consists of a five-step booking process which allows your customers to make a quick and easy reservation, as well as the administrative panel which allows you to personalize and continually improve your website and therefore your online business. The administrative panel allows you to configure the system and adjust the content, control commissions, correct prices toward the customer, statistics and static landing pages.

The booking process determines how users will manage their online hotel reservations. The user enters the desired city and dates of departure and return; views offered accommodation options; selects a hotel, room and price; enters payment method, and finally confirms the purchase.

These functions of the booking process will help you reach your desired profit.

We are announcing new products

By mid-2015, we will have two new products in our system – the internet booking engine for hotels and the rent-a-car reservation system for destinations around the world.

Hotel IBE

HOTEL IBE offers over 120 000 hotels in all the world's most attractive destinations. This reservation system can be used independently or in combination with existing systems. If you have our Flight IBE, you have the possibility to combine these products, and with this integration of offers a purchase is guaranteed. During the process of buying airline tickets or immediately after, the system can offer the customer hotel accommodation for the selected period of stay at the destination.

The system will have, in addition to the standard display of offers on the site, the option for B2B business. You will be able to monitor business performance through the advanced reporting system. The system can be fully customized to client needs, depending on the options they choose.

Rent-a-car IBE

Rent-a-car internet reservation system offers the possibility of booking a car of any category in all major international destinations.

The reservation system can be used independently or can be combined with the offers from our Hotel IBE and Flight IBE systems. During the reservation process or after the reservation has been confirmed, the system can provide car offers at the destination.

The system will have, in addition to the standard display of offers on the site, the option for B2B business. You will be able to monitor business performance through the advanced reporting system. The system can be fully customized to client needs, depending on the options they choose.
